Subject: microsoft settlement

Dear Sir: As a daily computer user, both at home and in my medical office, I have benefitted greatly from the software produced by Microsoft. It is inexpensive, easy to use and makes work and play easier on many different fronts. I strongly urge you to terminate the ongoing legal harassment of Microsoft and settle the case based on the agreement already negotiated by the DOJ and Microsoft. This will benefit consumers like me who want new and better software from Microsoft and do not want to see the Company spending its money and time defending itself from frivolous suits initiated by its competitors who now have the 9 remaining states as their hired goons. Thank you.

Harvey W. Topilow, MD
